

**MOBILE™**  
**WORLD CONGRESS**

Barcelona | 15-18 February 2010

In February, Dialog Semiconductor will be exhibiting at the GSMA World Mobile Congress 2010 in Barcelona.

You are invited to visit our booth AV98 (maps attached) to explore how Dialog's mixed signal technologies improve energy efficiency in your next generation mobile multimedia product.

Through the application of smart power management for battery charging, audio and display processing we can greatly enhance the end user experience and therefore value of your next generation product.

If you wish to schedule some time with our management or engineers, please send an email to [marketingevents@diasemi.com](mailto:marketingevents@diasemi.com) with the following information:

Name and title:  
Company name:  
Required date for the meeting:  
Required time for the meeting:  
Purpose of the meeting:  
Dialog contact (if known):

On receipt of your request, we will respond quickly with a confirmation of your meeting request.

**We look forward to meeting you!**
