Notes to Editors

Dialog Semiconductor creates energy-efficient, highly integrated, mixed-signal circuits optimised for personal mobile, lighting & display and automotive applications. The company provides flexible and dynamic support, world-class innovation and the assurance of dealing with an established business partner.

With its unique focus and expertise in system power management, Dialog brings decades of experience to the rapid development of integrated circuits for power management, audio, display

processing and motor control. Dialog's processor companion chips are essential for enhancing both the performance of hand-held products and the consumers' multimedia experience. With world-class manufacturing partners, Dialog operates a fabless business model.

Dialog Semiconductor plc is headquartered near Stuttgart with a global sales, R&D and marketing organisation. In 2009, it recorded \$218 million in revenue and was one of the fastest growing European public semiconductor companies. It currently has approximately 370 employees. The company is listed on the Frankfurt (FWB: DLG) stock exchange.
