

Environmental Statement for IC Products

Dialog Semiconductor is committed to environmentally responsible practices within its own business and promoting such practices across its supply chain. Dialog Semiconductor controls the design and outsources manufacturing of its integrated circuit products. Dialog Semiconductor also performs assessments, including of its outsourced manufacturers, regarding RoHS and REACH requirements. Additional assessments are made to verify customer-specific requirements for managing hazardous substances.

Restriction of Hazardous Substances (RoHS)

Use of certain hazardous substances in electrical and electronic equipment is restricted by Annex II of Directive 2011/65/EU, as amended by Directive (EU) 2015/863 – Annex II (“RoHS”).

To the best of Dialog Semiconductor’s knowledge, its products are in compliance with RoHS.

RoHS restricted substances and their maximum concentration values tolerated by weight in homogeneous materials are as follows:

RoHS Restricted Substances	Chemical Symbol	Limit
Lead	Pb	1000ppm
Mercury	Hg	1000ppm
Cadmium	Cd	100ppm
Chromium +6	Cr +6	1000ppm
Polybrominated Biphenyls	PBB	1000ppm
Polybrominated Diphenyl Ethers	PBDE	1000ppm
Bis(2-ethylhexyl) phthalate	DEHP	1000ppm
Butyl benzyl phthalate	BBP	1000ppm
Dibutyl phthalate	DBP	1000ppm
Diisobutyl phthalate	DIBP	1000ppm

Registration, Evaluation, Authorization and Restriction of Chemicals (REACH)

The microelectronic components manufactured on behalf of Dialog Semiconductor are considered to be “articles” under Regulation (EC) No. 1907/2006 (the “REACH Regulation”). As Dialog Semiconductor’s products do not release any substances during normal and reasonably foreseeable conditions of use, they are not subject to registration under the REACH Regulation, nor is Dialog Semiconductor required to notify the European Chemicals Agency (“ECHA”) under Article 7 of the REACH Regulation.

To the best of Dialog Semiconductor’s knowledge, Dialog Semiconductor’s products [and packing materials used for shipping these products] do not contain: (1) any substances included in the Substances of Very High Concern (SVHC) candidate list (SVHC) published by the ECHA in a concentration greater than the regulatory threshold of 0.1% percent; or (2) any substances listed in Annex XVII of the REACH Regulation above the regulatory thresholds.

Conflict Minerals

Dialog Semiconductor supports international efforts to ensure that the mining and trading of tin, tungsten, tantalum and gold (“3TG”) from high-risk locations does not contribute to conflict and/or serious human rights abuses in the Democratic Republic of the Congo (“DRC”) and the Great Lakes region of Africa (or elsewhere). Although Dialog Semiconductor is not subject to the conflict minerals reporting requirements set out in Section 1502 of the US Dodd-Frank Wall Street Reform and Consumer Protection Act, many of its customers are. In this context, Dialog

Semiconductor assists its customers by providing them with the results of its conflict mineral assessments at its suppliers.

Dialog Semiconductor's Supplier Code of Conduct requires suppliers to complete and return information requests regarding the origin of any 3TG contained in products supplied to Dialog Semiconductor. In this regard, Dialog Semiconductor uses the Conflict Minerals Reporting Template ("CMRT"), which was created by the Responsible Minerals Initiative ("RMI") to facilitate the delivery of accurate information to customers about the country of origin and the location of smelters and refiners used by its outsourced manufacturers in their 3TG supply chain.
